Systems for Continual Improvement

COURSE OVERVIEW

Are you ready to join the journey to becoming a world-class organisation? Most organisations improve as a reaction to feedback or in increments driven by a particular project. What if you could improve continuously, across the board, by being innovative and proactive? Critically, what if you could change before your competitor does?

This Systems for Continued Improvement course from our Management and Leadership course range, is designed to give the most current ideas, skills, and the necessary tools to take away and implement in your organisation. For any organisation to be successful and to continually improve, the commitment of management and all personnel is vital. Designed for all levels of the organisation, this course focuses on practical methods to build both engagement and commitment to a proactive workforce. It covers topics that help identify opportunities for improvement – from implementing and evaluating innovation, to critical thinking and social sustainability.

WHO SHOULD ATTEND?

Managers, Team Leaders & Supervisors working in an operational or administrative environment who are responsible for the day to day management of an organisation's management system. This would include purchasing, human resources, senior management and quality assurance personnel.

Safety, Quality & Compliance Managers in an operational or administrative environment who are responsible for ensuring that organisational and operational compliance is maintained, whilst continually improving performance.

Lead & Internal Auditors looking to further develop their knowledge of effective systems management and continual improvement.
